PHILOSOPHY

L'école n'est pas seulement le lieu où se prépare une carrière ou une profession : elle doit permettre aussi de développer toute la personnalité et de relier celle-ci à la vie sociale et planétaire. C'est pourquoi, tout en attachant une grande importance aux sujets académiques, nous favorisons également l'imagination, les activités sportives et artistiques, ainsi que l'apprentissage de la relation. Dans cette optique, nous trouvons important d'encourager chacun à se découvrir, à se comprendre soi-même et à apprendre la réflexion tant par l'attention et la conscience de son propre comportement que par l'intégration personnelle des connaissances. A cet effet, l'esprit critique nous paraît essentiel dans notre monde en mutation profonde: nous cherchons à le développer par le décodage de l'environnement médiatique et le questionnement scientifique.
